

Installation ► Accessibility

Our clients appreciate the experience and training DC Elevator has accumulated over decades in all areas of accessibility installation. From code requirements to safety standards, from industry best practices to safe equipment operation - our knowledgeable staff makes us your best choice for all accessibility needs.

Making Your World Accessible

Customers in Kentucky and the neighboring states rely on our experience of forty years in commercial elevator technology and look to us for their accessibility solutions. Sometimes life comes at you fast, and then you need a competent partner to adjust your familiar environment to suit your new needs. Or you need to add accessibility features to your office location because of code changes, and you are looking for the best solution.

Working for Your Independence

We have not only the experience and track record, but also a dedicated team that assists you from the planning stage to the first use, and for years to come – with maintenance, and compliant with code. We take our commitment to quality and craft seriously and take pride in the satisfaction of our customers.

You won't let your needs limit your independence, and we are set to help you remove the obstacles in your way. Together, we open up your world. And we strive to promote independence, matching your specific needs with affordable options.

To find out which solution is best suited for your residence or business location, please contact us to speak with a certified accessibility technician. We are looking forward to evaluating your site with you, and provide you with our recommendation.

Please call or email us with your questions, thoughts, and ideas.

Experienced Installers and Exceptional Service

DC Elevator’s experienced installers rely on a proven process to provide excellent service, which utilizes their expertise and all the information at hand. They coordinate with your builder or construction company and will provide the project specifications, timelines and drawings needed. As a result, we meet all site preparation requirements involving third parties before we engage in the actual installation.

Solutions to Individual Challenges

Pending home or building needs and ADA guidelines, different lift and elevator types provide unique solutions to your challenges.

Our experience makes us confident in walking you through the selection process, recommending alternatives, and helping you within your budget.

These are the most common products used in commercial structures:

- LU/LA Elevator
- Vertical Platform Lift
- Inclined Platform Lift
- Stair Lift
- Specialty Lift

The Case for DC Elevator
