

Solutions > Education

Schools, colleges, and universities have always had a demand for vertical transportation solutions of varying scale and capacity. From a dormitory to a library, from an auditorium to a stadium – DC Elevator has helped move students, faculty, and materials at places of education for decades.

Safety First

DC Elevator provides and maintains public safety protection within the required parameters, and in accordance with governing laws, rules, regulations, and ordinances.

Our overarching goal is always a safe environment for technicians, and the safety and wellbeing of students, teachers, and school administrators. We work hard to get everybody to the classroom, perfectly safe and in time.

Solutions at Any Scale

Often, smaller institutions feature only a single elevator system, and any interruption in its system is considered an emergency situation.

DC Elevator understands this challenge and has provided repair and maintenance service through multiple certified elevator technicians simultaneously in several instances, to minimize the risk for the school or university.

As Kentucky's largest independent elevator company, our flexibility is unmatched, and our access to parts and services mostly unrestricted.

Pending regulations of the respective school systems, we have performed all maintenance and installation under the requirements defined by OEM standards, compliant to specifications, and on schedule.

Please call or email me with questions, thoughts, and ideas.
