

Freight Elevators

Reliable Performance Elevators for Heavy Lifting

Freight elevators are the workhorses of the elevator world, responsible for transporting goods and materials in warehouses, industrial and manufacturing environments, shopping centers, airports, train stations, and seaports. Rugged in nature, they are expertly designed by engineers to have the right power and drive to vertically move and load, pending the need and class standards.

Manufacturers

We are an authorized dealer for many leading freight elevator suppliers and manufacturers. We recommend the use of non-proprietary equipment because it ensures that your elevator installation brings the best value to your building.

The Case for DC Elevator

Please see our case studies for examples of how we solved our clients' problems, and what they have to say about it. Contact us with questions about freight elevators, discuss your building situation, and find out if this elevator type is right for you.

Features

- Loading: 2,500 – 10,000 lbs; loading defined only by class regulation
- Travel Height: Up to 60 ft; higher with fewer load requirements
- Speed: 150 ft/min
- Drive: Direct-Acting / 1:2 Roped
- Class: Available with Class A, B, C1, C2, C3 loading capability

Benefits

- Designed for industrial and commercial application
- Flexibility in design to accommodate the application
- Jackhole not required with holeless drive
- Eco-friendly with use of biodegradable hydraulic oil
- Variable door designs accommodate most requirements
- Engineered to accommodate customer needs and class standards
- Manufactured and installed per current industry code standards
